These vineyard sites are influenced by southerly breezes during the summer months which have a beneficial effect on the ripening of the grapes. Trellised vineyards with supplementary irrigation grown on mainly decomposed granite soils.

about the harvest

Grapes were harvested between 24.5 and 24.8 °B with an acid between 6.6 and 7.1 g/l and a pH of between 3.4 and 3.5.

in the cellar

Fermentation initiated in stainless steel tanks. The crushed grapes underwent a series of pump overs until dry. Further maceration was allowed before drawing off and light pressing. Malolactic fermentation was completed in French oak barrels. The wine spent 18 months in 25% 1st fill French oak barrels the balance in second, third and fourth fill barrels.
